

## **Nutrition, Health, and Physical Education**

The board recognizes that a healthy school environment prepares students for college, careers, and successful futures. Students who eat well-balanced meals and engage in regular exercise are more likely to learn in the classroom. The board supports the district's increased emphasis on nutrition, health, physical education, and physical activity at all grade levels to enhance the well-being of the district's students. Therefore, it is the policy of the board to provide students with access to nutritious food, emphasize health education and physical education, and provide students with opportunities for physical activity. The board recognizes the benefits of scheduling at least 20 minutes of seat time for lunch for every student and scheduling recess before lunch for elementary students. Consequently, to the extent appropriate and feasible, the superintendent or designee will strive to identify and remove barriers to these practices and periodically report back to the board.

### **Wellness Policy**

The district, through a wellness committee, will develop and implement a comprehensive wellness policy in compliance with state and federal requirements for districts participating in the National School Lunch Program, the School Breakfast Program, and the United States Department of Agriculture (USDA) Smart Snacks in School nutrition standards.

### **Nutrition and Food Services Program**

The board supports the philosophy of the National School Lunch and School Breakfast Programs and will provide wholesome and nutritious meals for children in the district's schools. The board authorizes the superintendent or designee to administer the food services program, provided that any decision to enter into a contract with a food service management company will require the approval of the board. Expenditures for food supplies shall not exceed the estimated revenues.

The superintendent or designee is responsible for:

- Annually distributing meal applications and determining eligibility for school meals;
- Protecting the identity of students eligible for free and reduced-price meals;
- Ensuring meals meet USDA meal pattern requirements;
- Ensuring meal periods are in compliance with USDA regulations;
- Establishing a Food Safety Plan;
- Determining meal prices and submitting them to the board for approval annually;
- Using the full entitlement of USDA Foods;
- Maintaining a nonprofit school food service account;
- Ensuring all revenues are used solely for the school meal program;
- Establishing a meal charge policy if not serving meals at no cost to students;
- Accommodating children with special dietary needs;
- Ensuring compliance with USDA nondiscrimination policies;
- Following proper procurement procedures; and
- Ensuring compliance with the Smart Snacks in School nutrition standards.

### **Health and Physical Education Program**

The district's K-12 health and physical education programs will be aligned with the Washington State Health and Physical Education K-12 Learning Standards and will include, but not be limited to, the development of knowledge and skills to be physically active, eat nutritiously, access reliable health information and services, communicate effectively, and set health-enhancing goals.

The district will ensure that the following requirements are met:

- All students in grades one through eight receive an average of one hundred instructional minutes per week of physical education per year.
- All high school students are required to complete a minimum of three semesters (1.5 credits) of physical education and one semester (.5 credit) of health education.

- Any student who is excused from participation on account of physical disability, employment, religious belief, participation in directed athletics or military science and tactics, or for other good cause will be required to demonstrate mastery of the knowledge portion of the fitness requirement, in accordance with district policy.
- The district will offer a one-credit course or its equivalent in physical education for each grade in the high school program (grades 9-12).
- All students have equal and equitable opportunities for health and physical education.
- All students, from kindergarten through grade 12, will participate in a quality, standards-based health and physical education program.
- OSPI developed assessments or other strategies will be used in health and physical education, formerly known as classroom-based assessments.

Additionally, school districts must conduct an annual review of their physical education (PE) programs. The review must consist of numerous provisions, including:

- The number of individual students completing a PE class during the school year;
- The average number of minutes per week of PE received by students in grades 1 through 8, expressed in appropriate reporting ranges;
- The number of students granted waivers (excused from participation) from PE requirements;
- An indication of whether all PE classes are taught by instructors who possess a valid health and fitness endorsement;
- The PE class sizes, expressed in appropriate reporting ranges;
- An indication of whether, as a matter of policy or procedure, the district routinely modifies and adapts its PE curriculum for students with disabilities; and
- An indication of whether the district routinely excludes students from PE classes for disciplinary reasons.

As a best practice and subject to available funding, the district will strive to ensure that the following occur:

- Students will be moderately to vigorously active for at least 50% of class time during most or all physical education class sessions.
- All schools will have certificated physical education teachers providing instruction.
- All schools will have appropriate class sizes, facilities, equipment, and supplies needed to deliver quality health and physical education consistent with state standards.
- All physical education teachers will be encouraged to participate in professional development in physical education at least once a year.

### **Physical Activity**

Physical education class is not to be used or withheld as punishment for any reason. All schools, as a best practice and subject to available funding, will participate in a multi-component approach by which schools use all opportunities for students to be physically active, such as the Comprehensive School Physical Activity Program recommended by the Centers for Disease Control and Prevention, and will provide the following:

- Quality physical education;
- Physical activity during the school day (e.g., brain boosters/energizers);
- Physical activity before and after school;
- Recess that aims to be safe, inclusive, and high quality;
- Family and community engagement;
- Staff wellness and health promotion;
- Opportunities for active transportation to school; and
- Access to school district facilities for physical activity, fitness, sports, and recreation programs.
